

VSA Automation360

Jumpstart your success with intelligent automation

WHY AUTOMATION360?

THE KEY TO MAXIMIZING YOUR PROFITS

Automation means understanding your critical workflows and leveraging multiple modules within the VSA to efficiently manage your environment.

With *Automation360*, learn how to have automation work for you. Maximize profits, reduce manual work, eliminate wasted effort, and drive both customer value and technician efficiency.

PROGRAM SERVICES

AUTOMATION KICK-OFF

You're in good hands. Trust our team of expert VSA masters to perform a holistic discovery that includes your business goals, concerns, and complex aspects of your environment. Then, our team crafts a custom Top 3 list of automation items based on your specific VSA workflow.

1:1 CONSULTATION WITH VSA EXPERTS

Allow our VSA experts to transform your IT technicians into Automation Masters during this dedicated consultation. We combine three key components to help you get the most out of your investment:

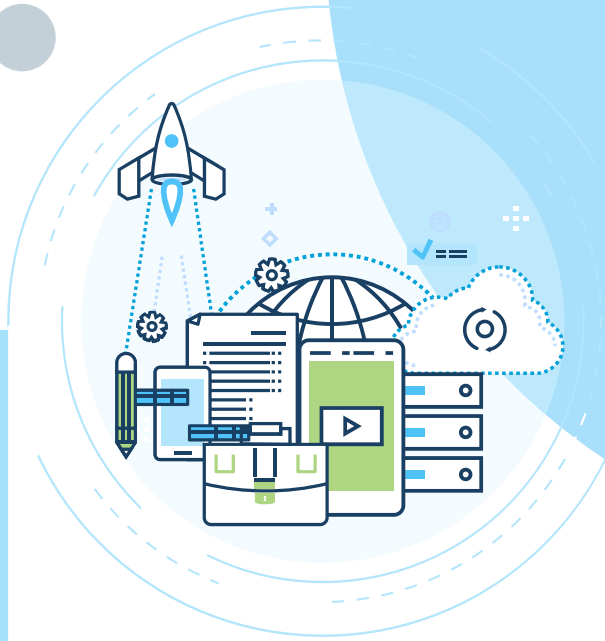

We Show You - Watch us build the first automation in your Top 3 list. Learn how the experts do it. See real-life applications of industry-level best practices.

We Coach You - Take the wheel with the second automation as your VSA trainer co-pilots. We provide the guardrails allowing you to get valuable hands-on experience.

You Build It - Create with confidence. You build the third automation while we observe; ready to support and give feedback wherever possible.

BENEFITS

- Implement global policies
- Increase automation usage
- See higher tech-to-endpoint ratio
- Improve endpoint compliance
- Establish centralized visibility
- Be confident in service levels with end users
