Traverse Review360

ANNUAL CONFIGURATION HEALTH CHECK WITH YOUR TRAVERSE EXPERTS

WHY REVIEW360?

Traverse powerfully manages your network devices, delivering control and peace of mind and allowing full management of your network environments.

The Traverse 360° Business Review assesses the overall health of your Traverse software, ensures you are maximizing your use of the tool, and not missing out on alerts or management opportunities.

AREAS OF ANALYSIS

- Active monitoring
- Server health
- Security audit: users, SSL, MFA
- Traverse collector output
- Log sizes and verbosity
- SNMP trap rate
- Departments and Profiles
- Device dependencies
- Dashboards and topology graphs
- IT Complete integrations with VSA, BMS and others

3 STEPS TO SUCCESS

1 DISCOVERY
Establish your business goals, workflows, and the parameters of your environment.

2 ANALYSIS
Receive comprehensive feedback from the contents of your Traverse account

3 REPORTING
Review key configuration findings and custom recommendations with our Review 360 Action Plan.
