Start delivering profitable IT compliance management services without being a compliance expert

EVERY BUSINESS MUST COMPLY WITH BASIC IT SECURITY PROTOCOLS – EVEN IF THEY ARE NOT REGULATED!

And many have additional IT security and privacy standards imposed on them by their industry or government regulators. As an MSP, it's your job to manage that process. So why not get paid for what you already do?

Compliance Manager does it for you!

- ✓ Streamlines data collection
- ✓ Identifies and prioritizes risks
- ✓ Provides remediation management plans
- ✓ Automatically generates required documentation
- ✓ Produces Evidence of Compliance

✎ Role-based architecture reduces your cost

Compliance Manager's role-based architecture distributes the workload and allows you to delegate most of the policy-based, manual data entry activities to your client stakeholders. This dramatically reduces your labor costs while ensuring you get the most accurate client information directly from the source.

✎ Automatic document generation saves you time

Compliance Manager collects most of the network and system data you need automatically, making Compliance Manager the fastest and easiest way to perform Compliance Risk Assessments and help your clients remain compliant. All documents required by each compliance standard are covered and all of them are automatically generated through the process.

✎ Compliance-as-a-Service makes you money

Compliance Manager's compliance server performs new scans periodically, letting you know when to update your assessments and quickly identify any changes or new compliance issues that need remediation. By offering Compliance-as-a-Service, you can ensure your clients achieve compliance and help them REMAIN compliant while also creating a recurring revenue stream that requires very little time to maintain.

COMPLIANCE MANAGER

COMPLIANCE MANAGER MODULES

Start delivering compliance services through our best-of-breed scanning and reporting platform.

HIPAA

Compliance Manager helps MSPs deliver ongoing HIPAA compliance for their healthcare sector clients as well as their Business Associates. The platform provides MSPs with guidance for addressing common HIPAA issues, finds hidden ePHI on servers and computers, documents HIPAA policy and procedure validations, and generates all required documentation for adhering to HIPAA guidelines.

GDPR

Compliance Manager is the first purpose-built, compliance process automation tool designed to ensure compliance with the EU General Data Protection Regulation (GDPR). The module produces all required compliancy documents, including a Risk Treatment Plan, Data Protection Impact Assessment and GDPR Evidence of Compliance.

CMMC

The Cybersecurity Maturity Model Certification (CMMC) is being rolled out for the 300,000+ non-federal organizations that make up the Department of Defense supply chain. Compliance Manager guides MSPs and their clients through the certification-readiness process, and once certified, helps document ongoing compliance to the standard.

NIST CSF

Compliance Manager uses the NIST Cybersecurity Framework (CSF) as the basis for many industry-specific security standards, including the NIST 800-171 and New York SHIELD Act, and many others. Our automated data collection and user-driven walkthrough simplifies security compliance and documentation.

CYBER INSURANCE

Although cyber liability insurance is in high demand, very few clients understand what it takes to actually receive a payout from a cyber insurance claim. A violation of even one of the many hidden IT security terms built into most policies can result in a denied claim in the event of a breach. Compliance Manager is the first software solution that allows policyholders and their MSPs to systematically check for issues that need to be remediated and provide evidence that they are meeting security requirements set by top insurance carriers.
